

# Aspire™ AIR sphere

CooperVision®  
Live Brightly.®

High performance. Outstanding value.

If you're nearsighted or farsighted and want the most for your money, choose CooperVision® Aspire™ AIR contact lenses for exceptional lens technology at a surprisingly affordable price. They're made from an advanced silicone hydrogel material specially developed for long-lasting comfort, easy handling\* and a healthy lens-wearing experience. And Aspire™ AIR contact lenses have the same trusted optical design features as our premium Aspire™ PRO contact lenses to help provide you with crisp, clear vision. They're a smart choice for savvy contact lens wearers like you.

## The features you'll love

- The Aberration Neutralizing System™ is designed to enhance vision quality by minimizing an optical imperfection† commonly found in eyes.<sup>1</sup>
- Advanced material naturally attracts water molecules, keeping the entire surface of your lenses continuously moist throughout your day.
- High breathability allows your eyes to get 100% of the oxygen they need‡, which helps keep them white<sup>2</sup> and healthy<sup>§3</sup>
- The highest class UV blocker available in a contact lens helps protect your eyes from the transmission of 90% UVA and 99% UVB.<sup>||</sup>

\* Based on subjective ratings at insertion and after 1 month. Results of a prospective, doublemasked, randomized, bilateral, crossover study comparing Avaira Vitality™ sphere contact lenses with a competitive reusable sphere lens.

† Spherical aberration.

‡ During daily wear.

§ With higher oxygen permeability than hydrogel materials, silicone hydrogel contact lenses minimize or eliminate hypoxia-related signs and symptoms during lens wear.

|| Warning: UV-absorbing contact lenses are not substitutes for protective UV-absorbing eyewear, such as UV-absorbing goggles or sunglasses, because they do not completely cover the eye and surrounding area. Patients should continue to use UV-absorbing eyewear as directed.
